

# Protect Every Repair

3M™ Cavity Wax Plus 08852 is a simple and effective way to ensure corrosion protection on inner body panels, one of the most important parts of the automotive repair process. All automotive OEMs provide specifications on applying corrosion protection, such as cavity waxes, during repairs.

Here are some example locations and the amount of 3M™ Cavity Wax Plus 08852 needed to complete the recommended three-coat application on a typical midsize sedan.
